TECHNICAL NOTICE EE 09-01

REQUESTED BY : Airlessystems

- *Date of request* : March 2009

DESCRIPTION OF PACKAGING :

- *Brand name* : EDEN
- *Shape* : cylinder-shaped spray can
- *Colour* : white
- *Volume* : 50 mL

MARKET :

- Cosmetics

MATERIALS :

- *Body* : PP + HDPE
- *Cap* : PP + HDPE push button, PP cap

TECHNICAL NOTICE :

This packaging is already on the market and easily visually identified. In the French system, it is channeled into the HDPE + PP stream for recycling.

The proportion of PP brought by this packaging in the French household stream of HDPE + PP bottles does not significantly increase the global proportion of PP in this stream. However the current PP content in the French household packaging stream comes close to the limit miscibility rate of PP in HDPE given by the Technical Sheet n° 38 "Influence of PP content in HDPE bottle stream."

Paris, May 11th, 2009.
