MARKET: Household care products

MATERIALS:

- Body: PET monolayer

TECHNICAL NOTICE:

The composition of the body and the overall structure of the bottle are completely compatible with the main recycling streams for PET packaging that are currently available in Europe.

Although, given the single gluing line, the quantity of glue is small, COTREP recommends testing its washability.

As stated in General Notice FT 21, the PP label does not disrupt the recycling of PET bottles.

The dark blue packaging is easily identifiable visually. It will continue to be directed to the dark-coloured PET stream for recycling.
